PROFILE

Experiencedandresult-oriented Network Engineer with over **13 years** of extensive experience in planning ,configuration ,installation and troubleshooting of large-scale networks. Proven expertise in working with leading hardware vendors such as Cisco, RAD, Raisecom, and Techroute under Reliance Jio Infocomm Pvt. Ltd. Skilled in designing LAN/WAN architecture, MPLS circuit design, IP planning, and configuring complex routing protocols like BGP, OSPF, and ISIS. Hands-on experience with Cisco routers (901/920/903/NCS540) and switches (2960, RAD L2) for enterprise-grade network deployments. Proficient in small cell integration, Wi-Fi planning (indoor/outdoor), and providing second-level technical support to field engineers and corporate clients. Adept at troubleshooting MPLS-related issues in coordination with central NOC, and delivering customized point-to-point network solutions. Demonstrated ability to maintain high availability of MPLS routers and ensure seamless network operations across clusters.

WORK EXPERIENCE

Reliance PPMSL — **2020 - PRESENT**

Network Engineer (Ghaziabad)

- Worked on planning, configuration, and troubleshooting of Cisco, RAD, Raisecom, and Techroute devices.
- Designed LAN/WAN and MPLS network diagrams based on site requirements.
- Configured Cisco routers (901/920/903/NCS540) and switches (2960, RAD L2) for enterprise networks.
- Handled MPLS circuit design, POP installation, and support with coordination from central NOC.
- Managed IP planning for IIL services and small cell integration with HO-NOC.
- Configured routing protocols like BGP, OSPF, and ISIS for optimal performance.
- Provided technical support to field engineers and resolved network issues end-to-end.
- Planned and deployed indoor/outdoor Wi-Fi networks across UW circle.
- Set up VLANs, wireless modems, and point-to-point solutions for corporate clients.
- Conducted testing of network equipment and ensured compliance with client standards.

Kutumbh CarePvt. Ltd — **2017 -2020**

Network Engineer (Ghaziabad)

- Installed, configured, and administered routers, switches, and wireless networks across centralized and distributed systems.
- Strong understanding of OSI Model and TCP/IP protocols including ARP, ICMP, TCP, UDP, FTP, and TFTP.
- Performed IP addressing, subnetting, and implemented routing protocols like RIP, OSPF, IGRP, and EIGRP.

LANGUAGES

Hindi
English

- Configured Cisco switches (1900, 2950, 2960) and routers (2500, 2600, 1800) including VLANs and trunking (ISL, dot1q).
- Implemented port security, access lists, and basic IP security on routers and switches.
- Managed WAN protocols like HDLC and PPP; configured and supported DHCP, DNS, and Proxy servers on Windows.
- Performed IOS backup/restore and recovery of router/switch passwords for network continuity.
- Worked on bridging, switching, and LAN technologies with a focus on stability and scalability.
- Configured wireless networks and used Windows systems as routers in specific use cases

Prompt personnel Consultancy Service Pvt Ltd **2015 -2017**

RAN Engineer (Muzaffarnagar)

- Installed and configured Cisco routers and switches in small to mid-size enterprise networks.
- Assisted in designing LAN/WAN infrastructure and implemented IP addressing and subnetting schemes.
- Configured VLANs, trunk ports, and inter-VLAN routing on Cisco Catalyst switches.
- Supported routing protocol configuration including RIP and OSPF in single and multi-area environments.
- Troubleshot network issues related to connectivity, performance, and configuration mismatches.
- Performed daily health checks, bandwidth monitoring, and device backup/restoration tasks.
- Configured and maintained DHCP and DNS services on Windows-based networks.
- Supported wireless network installation and basic security setup including port security and ACLs.
- Coordinated with senior engineers and NOC teams for escalated network issues.
- Documented network changes, topology diagrams, and standard operating procedures.

Kou-Chan Knowledge Convergence Pvt. Ltd **2012 -2015**

RAN Engineer (Muzaffarnagar)

- Worked on operation and maintenance of 2G and 3G Radio Access Network (RAN) ensuring high network availability and performance.
- Performed installation, commissioning, and integration of BTS and Node-B sites across assigned regions.
- Hands-on experience with NEC Microwave (MW) systems for link alignment, commissioning, and troubleshooting.
- Worked on Alcatel MUX equipment including configuration, fault analysis, and maintenance activities.
- Conducted drive tests and RF optimization activities to improve coverage, reduce call drops, and enhance throughput.
- Monitored network KPIs such as CSSR, CDR, HOSR, and took corrective actions to improve network quality.
- Analyzed alarms and performed fault management, root cause analysis, and preventive maintenance.
- Coordinated with NOC, vendors, and field teams to ensure timely resolution of network issues.
- Supported network expansion, modernization, and swap projects as per rollout plans.
- Maintained site documentation, acceptance reports, and ensured compliance with safety and quality standards.
